

Important Notes 重要提示

- 1 Manulife Global Fund – USD Income Fund (the “Fund”) invests primarily in fixed income securities and fixed income related securities denominated in U.S. Dollar of issuers globally. In meeting its investment objective, the Fund may invest more than 30% of its net assets in issuers located in the United States, which may involve credit rating and downgrading, credit, interest rate, sovereign debt, convertible securities, subordinated debt, collateralized/securities products, high-yield bonds, geographical concentration and currency risks and risks associated with investments in debt instruments with loss-absorption features (including contingent convertible bonds).
 - 2 The relevant distributing class of the Fund does not guarantee distribution of dividends, the frequency of distribution, and the amount/rate of dividends. Dividends may be paid out of income, realized capital gains and/or out of capital of the Fund in respect of Inc share class(es). Dividends may be paid out of realized capital gains, capital and/or gross income while charging all or part of their fees and expenses to capital (i.e. payment of fees and expenses out of capital) in respect of MDIST (G) and R MDIST (G) share class(es). Dividends paid out of capital of the Fund amount to a return or withdrawal of part of the amount of an investor's original investment or from any capital gains attributable to that original investment, and may result in an immediate decrease in the net asset value per share in respect of such class(es) of the Fund.
 - 3 The Fund intends to use financial derivative instruments (“FDIs”) for investment, efficient portfolio management and/or hedging purposes. The use of FDIs exposes the Fund to additional risks, including leverage risk, management risk, market risk, credit risk and liquidity risk.
 - 4 Investment involves risk. The Fund may expose its investors to capital loss. Investors should not base on this material alone to make investment decisions and should read the offering document for details, including the risk factors, charges and features of the Fund and its share classes.
