Moreover, you can make changes in the investment amount and choice of funds through your standing instruction, which enables you to flexibly arrange your investment.

I. Risks

1. The prices of Funds fluctuate, sometimes dramatically. The price of a Fund may move up or down, and may become valueless. It is as likely that losses will be incurred rather than profit made as a result of buying and selling Funds.
2. Since transactions may be settled overseas, client assets received or held by Manulife or its affiliates may be subject to the Applicable Laws of the relevant overseas jurisdiction which may be different from the Hong Kong Securities and Futures Ordinance and the rules made thereunder. Consequently, such client assets may not enjoy the same protection as that conferred on client assets received or held in Hong Kong.
3. Some of the Funds may invest in derivative instruments which may involve additional risks. For example, where such instruments are used for leveraging they may cause greater volatility. Some of the Funds will potentially make extensive use of derivatives including more complex derivative instruments or strategies to achieve their investment objective, this may give rise to additional exposure in that performance may rise or fall more than it would have done otherwise. In adverse situations, a Fund's use of derivative instruments may become ineffective and the Fund may suffer significant losses. The use of derivatives may give rise to leverage, liquidity, counterparty and valuation risks.
